## ADA RECOMMENDATIONS

# Emergency Preparedness

Every dental practice knows the importance of being prepared for unexpected emergencies. **The American Dental Association (ADA) recommends equipping emergency kits with a core set of medications to address a wide range of potential scenarios.** From managing allergic reactions to treating sudden cardiac events, these essential drugs ensure you can provide prompt and effective care when every second counts.

### Emergency Drug Kits

Our high-quality Vitalerkit emergency kit is tailored for dental practices and offers a convenient solution for practices that are looking for a complete solution. Utilize our annual replenishment program to save valuable time and money, while ensuring medications are always current and organized.

### Essential Emergency Medications for Every Dental Practice

- 1. Epinephrine (1:1,000 injection):** A life-saving medication used to treat severe allergic reactions (anaphylaxis) by relaxing airway muscles and improving breathing.
- 2. Diphenhydramine (or other antihistamines):** An antihistamine that helps alleviate allergic symptoms such as itching, swelling, and hives, and can serve as a secondary treatment for anaphylaxis.
- 3. Nitroglycerin (tablets or spray):** A fast-acting vasodilator used to relieve chest pain (angina) by improving blood flow to the heart.
- 4. Albuterol (inhaler):** A bronchodilator designed to quickly open airways during asthma attacks or bronchospasms, making breathing easier.
- 5. Aspirin (chewable):** An antiplatelet medication recommended for use during a suspected heart attack to reduce blood clot formation and improve outcomes.
- 6. Glucose (oral gel or tablets):** A quick source of sugar for individuals experiencing hypoglycemia to rapidly raise blood glucose levels.
- 7. Ammonia inhalants:** Used to revive patients experiencing syncope (fainting) by stimulating breathing reflexes.

### Ensure Your Emergency Medications Are Up-to-Date

Young Surgical offers a complete line of medications to help dental practices and oral surgeons prepare for a medical emergency. We currently offer an annual replenishment system to keep your emergency medications up to date. This once annual replacement saves your office time and money, while ensuring compliance and emergency preparedness.

### DID YOU KNOW?

The ADA reports that a dental practice can expect to encounter a medical emergency every

**2 to 4  
YEARS**

# Spotlight Items

## Essential Antidotes for Sedation and Anesthesia Safety

Dentists who use opioids or benzodiazepines for moderate or deep sedation, general anesthesia, or both should ensure their emergency kit includes antidotes. **Naloxone is essential for counteracting the effects of opioids, particularly respiratory depression.**

## Reliable Emergency Allergy Response

Auvi-Q® epinephrine injectors are **designed to provide a reliable and efficient means of treating severe allergic reactions.** With their compact design and voice-guided instructions, they support accurate administration in critical situations where prompt action is essential.

## Neffy® Nasal Spray

Neffy® epinephrine nasal sprays are designed to provide an alternative to the traditional needle injection. **This product is atomized and allows the user to easily administer the medication in the nose.**

## VitalertKit Emergency Book\*

This easy to use book features quick access tabs to jump to specific emergencies. **Each section contains vital information about the particular emergency, medication dosing and images about how some reactions could present.**

# Patient Safety Starts With Proper Drug Disposal

Don't overlook expired medications.

Managing medication stocks, including the identification and disposal of expired drugs, is crucial to your practice and patient safety. We understand the challenges you face in maintaining a comprehensive medication inventory amidst the demands of daily practice. To help you maintain compliance and ensure the safe disposal of expired medications, we offer a simple and convenient solution:

## Step 1

Purchase a designated disposal envelope

## Step 2

Complete the enclosed Emergency Kit Destruction form

## Step 3

Mail using the pre-paid and pre-addressed envelope

Our Introductory, Flat Rate

**\$24.99<sup>\*</sup> +  
SAVE 10%**

on any medication added to your disposal envelope order.\*\*

\* includes easy-to-use, pre-addressed and postage paid envelope.

\*\*Some exclusions may apply.

## Your Reliable Partner at Every Step

Our team is here to support you every step of the way, making medication management easier and more secure. Connect with us today for any questions you may have.

## SERVICE AND SOLUTIONS

# CONTINUING EDUCATION

Young Surgical offers CE webinars to ensure your practice stays up to date with market innovations, while also obtaining your continuing education credits. Our courses are hosted by a variety of experienced professionals and industry leaders. Most courses focus on emergency preparedness to ensure your practice is always prepared.
